

PROJECT DESIGN PHASE IV

PROJECT PLANNING PHASE

Date	02 October 2026
Team ID	SWTID-2026-1180
Project Name	Implement Client Script and UI Policy(incidents)
Maximum Marks	5 Marks

Project planning:

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Create UI policy	USN-1	Dynamically shows or hides asset fields and makes them mandatory when the incident category is set to Hardware.	2	High	Sundharesan K
Sprint-1	Create UI policy-Urgency	USN-2	Automatically makes the business justification and impact details mandatory and visible when the incident urgency is set to High.	1	High	Sundharesan.K
Sprint-1	Create Client Scripts	USN-3	Automates browser-level behavior by pre-populating user data, validating inputs live, and blocking invalid submission.prevent reload pages.	2	high	Sundharesan.K
Sprint-1	Create Onsubmit Client Script	USN-4	Validates form data upon submission and aborts the post (return false) if errors are found, preventing data loss and page reloads.	2	Medium	Sivakumar .M

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Create Onchange Client Scripts	USN-5	Evaluates field input values in real-time as the user types and displays instant inline helper warnings or error messages.	1	High	Sundharesan.K
Sprint 1	Create Onsubmit client scripts	USN-6	Validates form fields immediately before submission and safely halts the post if errors are detected, preventing full-page reloads and preserving user text.	1	high	Sivakumar.M
Sprint 1	Create OncellEdit client Scripts	USN-7	Validates changes made directly to cell values within list views and allows you to cancel updates before they are committed to the database.	1	high	Sivakumar.M
Sprint 1	Test Mandatory Enforcement	USN-8	Verifies that required fields successfully block form submission and display error notifications when left blank.	2	high	Sivakumar.M
Sprint 2	Test Successful Save	USN-9	Confirms that valid form inputs pass all validation checks and successfully commit records to the database without errors.	2	high	Tarun Venkat M
Sprint 3	Reverse Condition Test	USN-10	Verifies that UI policy actions and field properties correctly revert to their original states when the triggering condition becomes false.	2	high	Tarun Venkat M
Sprint 4	Test ListEdit Blocking	USN-11	Verifies that an onCellEdit script successfully intercepts and halts invalid inline updates made within a list view, preventing unvalidated changes from saving.	2	high	Tarun Venkat M

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint 5	Test Form Based Update	USN-12	Verifies that modifications made and saved on an existing form record successfully trigger validation rules and commit correctly to the database.	2	high	Kiri R
Sprint 6	Conclusion	USN-13	Successfully optimizing the ServiceNow Incident form through strategic Client Scripts, UI Policies, and rigorous testing protocols significantly enhances data integrity, reduces form clutter, and streamlines the user experience.	2	high	Kiri R

SPRINT	ACTIVITIES	POINTS	NAME
Sprint 1	Create UI&client Scripts	12	Sundharesan K &Sivakumar M
Sprint 2	Test successful save	2	Tarun Venkat M
Sprint 3	Reverse condition test	2	Tarun Venkat M
Sprint 4	Test listedit blocking	2	Tarun Venkat M
Sprint 5	Test form based update	2	Kiri R
	total	20
